

Why would you want to ban traffic and weather updates from XM Radio? I got XM Radio for the simple reason of when I go to car shows around the nation I dont have to mess around with attempting to find another station in that area. And with Instant Weather and Traffic Updates its makes it easier on my club, EnVus Mid-West ([www.envuscc.com](http://www.envuscc.com)), to find out how the weather is in the area we are showing in. We, the XM Radio listeners, are paying for a service. Its worse enough the FCC censors music on the AM and FM, they [the FCC] has NO right saying what we can and cant listen to, espically when we are paying for a service, like XM Radio.
